Hiring Manager

Clipboard Health

Remote / Distributed Company

United States

Dear Clipboard Hiring Team,

I'm excited to apply for the Customer Experience Specialist role because the way Clipboard approaches customer support strongly aligns with how I already work – treating support not just as answering questions, but as owning problems and helping people move forward with confidence.

In my current role supporting MTN Zambia customers through iSON Xperiences, I work in a high-volume environment where accuracy, speed, and empathy all matter at the same time. I manage customer issues from initial contact through investigation, documentation, escalation, and final resolution using ServiceNow, while maintaining my KPI's, strict SLA targets and quality standards. The role has strengthened my ability to think critically under pressure, communicate clearly with different types of users, and handle sensitive account and payment-related concerns responsibly.

Alongside customer operations, my background in IT support has helped me become comfortable troubleshooting technical workflows and translating complex issues into simple explanations customers can understand. I enjoy situations where problems are not immediately obvious and require gathering context, asking the right questions, and working collaboratively to reach solutions.

What attracts me most to Clipboard is your focus on ownership, operational excellence, and growth from within. I value environments where initiative is encouraged and where support teams play an active role in improving systems and customer experiences, not just reacting to issues.

I am confident that my experience in customer support operations, combined with strong communication skills and a proactive mindset, would allow me to contribute positively to your Worker Operations team while continuing to grow professionally.

Thank you for your time and consideration. I would welcome the opportunity to contribute to Clipboard's mission and support the professionals who rely on your platform every day.

Kind regards,

Bwalya Adrian Mange
